Unseen Passage for Class 12 Students

In recent years, the concept of sustainability has gained significant attention across various sectors, including education, business, and environmental conservation.

Sustainability refers to the ability to meet the needs of the present without compromising the ability of future generations to meet their own needs. This idea encompasses a broad range of practices aimed at ensuring ecological balance, economic viability, and social equity.

Educational institutions are increasingly integrating sustainability into their curricula, encouraging students to engage with pressing global issues such as climate change and resource depletion. By fostering a mindset geared toward sustainable development, schools are preparing students to become responsible citizens who can contribute positively to society.

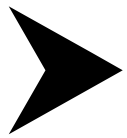

Unseen Passage for Class 12 Students

Businesses are also recognising the importance of sustainability. Companies that adopt sustainable practices not only enhance their brand reputation but also achieve long-term profitability.

This shift towards sustainability is often driven by consumer demand for environmentally friendly products and services. As a result, businesses are investing in innovative technologies and practices that minimize their ecological footprint while maximizing efficiency.

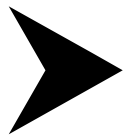

In conclusion, sustainability is not merely a trend but a necessary approach for ensuring a viable future. By embedding sustainable practices in education and business, society can work towards a more balanced and equitable world.
